**THE MOSAIC COMPANY® EXPERIENCES 30% REVENUE GROWTH DESPITE  
STILL-SLUGGISH ECONOMY  
Company forecasts continued growth in 2011**

*Renton, Wash. (June 22, 2011)* – Despite the still-sluggish U.S. economy, The Mosaic Company®, a North American consulting and training provider for the energy and utility industry, experienced 30% growth in revenues during the first quarter of 2011 compared to the same period in 2010. The company forecasts the trend will continue throughout 2011 and expects the uptick to result in as much as 40% growth in its workforce to meet project demands.

Company CEO Megan Deans attributes the growth to several key trends. First, the energy and utility industries are reinvesting in their workforce as their business recovers from the economic challenges of the past few years. Secondly, utility and energy companies have found outsourcing custom training design and development as well as training delivery to be very cost effective.

“Our clients have also found that partnering with an outside training firm allows them to capitalize on our specific expertise,” explained Deans. “Additionally, outsourcing offers the flexibility to respond on an “as-needed” basis without the extra overhead.”

Since January, Mosaic has hired one part-time and eight full-time employees and 10 contract consultants and expects to fill numerous consultant, senior consultant, project management and change management consultant positions by the end of the year.
